When will client be taking samples? (Please circle)

Note: If multiple dates, samples should be frozen (up to 30 days) and shipped as a group.

Birth

Branding/Marking

Weaning

Other _____

What is the approximate date samples will be taken?

Total animals client will be sampling?

Note: sampling tubes will be shipped in groups of 100

Order ear notcher (\$19.95)

API will be shipping tubes to the client shipping address using UPS ground service. After API receives samples, next business day results will be sent to client and copied to Superior for verification of negative. If positive calves are found, API will work with client and their veterinarian to develop a testing and vaccination program to eliminate the BVD disease from the herd if requested. Positive PI animals should be removed and isolated immediately from the negative animals. Recommendations for disposal are according to the NCBA adopted guidelines.

If you have any questions regarding testing or BVD PI control programs, call API customer service at: 503-247-8066

Client will be invoiced by Superior at \$2.90 for each sample returned to API facility. The price includes all tubes, testing and one overnight next day UPS return shipment.

If any questions regarding billing or marketing negative PI cattle call Superior at 1-800-422-2117.
